

Atlas Change Service API Reference

Normative API contract for version 2.1

Version	2.1
Authority	Product API specification
Effective	2026-07-15

This document is the authoritative contract for Atlas Change Service endpoints. The service base path is /change-api.

Service identity

Service	Atlas Change Service
Base path	/change-api
API version	v2

Create change

The create-change operation uses the POST method.

Canonical operation: **POST /v2/changes**.

- The Idempotency-Key header is required.
- Synchronous validation timeout is 30 seconds.
- A successful request returns HTTP 202.

Get change

GET /v2/changes/{changeId} returns the latest workflow state.

States	DRAFT, PENDING_APPROVAL, SCHEDULED, RUNNING, SUCCEEDED, FAILED
Not found	HTTP 404 when the identifier is unknown
